

## **ORAL TEST: Job Interview**

**You will participate in a simulated job interview for an internship position at WSP. The job profile is provided below.**

**The interview will be approximately four minutes, beginning with a one-minute self-introduction, followed by three to four questions from the interview panel.**

Your performance will be assessed based on content, fluency, grammar, and vocabulary used in your responses during the interview.

### **Job Description**

WSP offers internships across the U.S. for hands-on experience. Interns work on real projects alongside senior staff. We are hiring a Full-time Intern for Summer 2025 in our New York City office. This temporary position is open to undergraduate students. The internship begins on May 19th, 2025, with flexible start dates.

### **Responsibilities:**

- Learn basic Engineering principles.
- Assist with project research, field work, testing, design calculations, and analysis.
- Help prepare design plans.
- Perform additional tasks as needed.

### **Required Qualifications:**

- Enrolled in an undergraduate program.
- Interest in Mechanical Engineering and a desire to develop skills for WSP projects.
- Strong interpersonal and communication skills, able to express ideas effectively.
- Basic proficiency in technical writing, software, spreadsheets, and tools.

### **About WSP**

WSP USA is part of WSP, a global leader in engineering and professional services. We serve local communities as engineers, planners, technical experts, and advisors. With 15,000+ employees in 300+ offices, we deliver sustainable solutions in buildings, transportation, energy, water, and environment.
